
TECHNICAL DATA SHEET

SPEEDKLEEN

PRODUCT DESCRIPTION

SPEEDKLEEN is a concentrated alkaline cleaner guaranteed to shift even the toughest grime. A powerful grease-cutter, SPEEDKLEEN is particularly useful for cleaning floors. SPEEDKLEEN is NOT recommended for use on polished floors and should be used with caution on aluminium.

DIRECTIONS FOR USE

Light duty: Mix 10mls SPEED-KLEEN to 1 litre water.
Medium duty: Mix 10mls SPEED-KLEEN to 300mls water.
Heavy duty: Use between 1 part SPEEDKLEEN to 5 parts water up to full strength.

RECOMMENDED PROCEDURE FOR USING AN ALKALINE CLEANER (eg.SPEEDKLEEN)

Alkaline cleaners may be used as grease and oil-absorbing chemicals. To be used correctly the product should be diluted in warm/hot water, spread liberally on the surface and scrubbed. (Scrubbing machine such as POLIVAC or deck scrub for floors)

This solution should then be removed from the surface by mop or wet vacuum cleaner if possible, depending on the surface being cleaned. (Using a wet vacuum cleaner is the best method when dealing with deep grouted gutters in tiled floors as any greasy water remaining on the grout will, as it dries, build up layers of grime and discolour the grout.)

The next step is to rinse well with either hot or warm water or, if SUITABLE, hose out. Rinsing may need to be done several times to remove all traces of grease and grime.

WARNING: This product is corrosive in its undiluted form and care should taken during use.

STORAGE

Store SPEEDKLEEN sealed in a cool dry area.

ADDITIONAL INFORMATION

Additional information is detailed in the Material Safety Data Sheet which may be obtained from North Queensland Chemicals & Paints.

GENERAL: The information and recommendations in this data sheet are to the best of our knowledge reliable. However, nothing herein is to be construed as a warranty or representation. Users should make their own tests to determine the applicability of such information or the suitability of any products for their own particular purpose.
