

TECHNICAL DATA SHEET

GREASOFF

HEAVY DUTY ALKALINE CLEANER

PRODUCT DESCRIPTION

GREASOFF is an odourless, highly concentrated medium foam cleanser for quick removal of grease, oil, grime, etc by hand, steam cleaner or pressure washer. GREASOFF is non-flammable, non-toxic, therefore safe when used as directed. It will not adversely affect paint, nor etch glass and metals such as aluminium or zinc.

APPLICATIONS

GREASOFF may be used to clean hard surfaces in kitchens, on stoves and grills, walls and floors; even on pots and pans. GREASOFF is NOT recommended for use on polished floors.

DIRECTIONS

DO NOT SWALLOW. Avoid contact with eyes and skin. Wear suitable protective clothing and gloves.

MANUAL USE (Using mop, scourer, sponge or cloth)

Floors & Walls: 10 mls of GREASOFF to 500 mls of water for general use
1 to 10 for heavy deposits.

PRESSURE WASHERS AND STEAM CLEANERS

Place GREASOFF in the detergent feed tank, turn feed meter to zero. Switch the machine on and turn detergent meter on until foaming appears on surface to be cleaned. This concentration will be suitable for normal cleaning operations, but may have to be increased for heavy deposits.

RECOMMENDED PROCEDURE FOR USING AN ALKALINE CLEANER (eg.GREASOFF)

- Alkaline cleaners may be used as grease-absorbing chemicals. To be used correctly the product should be diluted in warm/hot water, spread liberally on the surface and scrubbed. (Deck scrub for floors)
- This solution should then be removed from the surface by cloth, mop or wet vacuum cleaner if possible, depending on the surface being cleaned. (Using a wet vacuum cleaner is the best method when dealing with deep grouted gutters in tiled floors as any greasy water remaining on the grout will, as it dries, build up layers of grime and discolour the grout.)
- The next step is to rinse well with either hot or warm water or, if SUITABLE, hose out. Rinsing may need to be done several times to remove all traces of grease and grime.

STORAGE

Store GREASOFF sealed in a cool dry area. Always replace lid after use. Keep away from children.

ADDITIONAL INFORMATION

Additional information is detailed in the Material Safety Data Sheet which may be obtained from North Queensland Chemicals & Paints.
