

TECHNICAL DATA SHEET

SANIDET

PRODUCT DESCRIPTION

Sanidet is a concentrated sanitising cleanser, low foaming, phosphate free and pH neutral, formulated for hard surface cleaning and sanitising in food preparation areas. It contains approximately 4% Quaternary Ammonium Compound. Sanidet has been approved for use in food preparation areas, as a category 7 Sanitiser/Detergent, by the Australian Quarantine Inspection Service (AQIS).

APPLICATIONS

Sanidet is formulated for cleaning and sanitising in commercial kitchens. It can be used as a general purpose cleaner, and may also be used for dishwashing providing items are rinsed with potable water. (Sanidet is not suitable as a heavy-duty grease cutting agent for items such as grill plates, ovens and fryers.)

DIRECTIONS

Heavy duty cleaning:	Use undiluted to 1:20 parts water.
General cleaning:	Use up to 1:100 parts water.
Sanitising:	Use undiluted to 1:20 parts water. Surface area to be sanitised should be thoroughly cleaned.

Contact time for effective sanitising should be long enough to produce complete kill of bacteria, usually 10 minutes or longer. Rinse product-contacting surfaces with potable water.

STORAGE

SANIDET is very stable and will remain in peak condition for 12 months if stored properly. Replace lid straight after use and avoid temperature extremes in storage areas.

SAFETY PRECAUTIONS

Do not mix chemicals and always add chemicals to water.

KEEP ALL CHEMICALS OUT OF REACH OF CHILDREN. If poisoning occurs, contact a Doctor or Poisons Information Centre. **National Poisons Information Centre Dial 13 1126 (from anywhere in Australia).** Additional information is listed in the Material Safety Data Sheet.

GENERAL: The information and recommendations in this data sheet are to the best of our knowledge reliable. However, nothing herein is to be construed as a warranty or representation. Users should make their own tests to determine the applicability of such information or the suitability of any products for their own particular purpose.
