

TECHNICAL DATA SHEET

MOP & SHINE

PRODUCT DESCRIPTION

MOP & SHINE is a powerful floor cleaner with a built-in shine. By simply adding MOP & SHINE to water and damp mopping, a clean, glossy floor is produced. **MOP & SHINE is non-hazardous and contains no phosphates.**

APPLICATIONS

MOP & SHINE has been especially formulated for cleaning and retaining or replacing the gloss on polished floors without polishing.

DIRECTIONS:

NB: Ensure mopping solution is changed when it becomes dirty.

- Maintenance cleaning:: To clean and maintain the shine on floors dilute 1:80 parts water (approx. 1/3 cup per bucket). Damp-mop floor and allow to dry.
- Heavy duty cleaning: For very dirty floors, or where there is little shine left, increase dilution rate up to 1:50 parts water (approx. ½ cup per bucket).
- Extra shine: This can be achieved by applying several coats of MOP & SHINE, allowing each coat to dry before applying the next coat. In addition, buffing by hand or machine increases the shine. In some cases it may be necessary to seal floors first with a floor sealer.

STORAGE CONDITIONS

MOP & SHINE is stable and it should store for at least 12 months in top condition. Always replace the cap as soon as decanting is finished. Avoid temperature extremes in storage area.

SAFETY PRECAUTIONS

Do not mix chemicals and always add chemicals to water.

KEEP ALL CHEMICALS OUT OF REACH OF CHILDREN. If poisoning occurs, contact a Doctor or Poisons Information Centre. **National Poisons Information Centre Dial 13 1126 (from anywhere in Australia).** Additional information is listed in the Material Safety Data Sheet.

GENERAL: The information and recommendations in this data sheet are to the best of our knowledge reliable. However, nothing herein is to be construed as a warranty or representation. Users should make their own tests to determine the applicability of such information or the suitability of any products for their own particular purpose.
